

An in-depth look at Stage-1 customizing a 1999 Honda Prelude Type SH from start to finish: complete with pictures, and how-tos.

---

# PRELUDE

---

The 1999 Honda Prelude Type SH featured in this guide was purchased in December of 2017. The vehicle was had all of the original interior, exterior, and internals. Additionally, there were only 55,000 miles on the motor, which is the famed H22a4 2.2 liter motor with VTEC.

**The Inspiration:**

The inspiration for my Prelude build comes from the Porsche 911. My father owned one when he lived in Germany. He would tell me stories about the elegant design and the ferocity of the motors.

Growing up, we would work on cars together. One of my hopes with this guide is to pass down a 1-on-1 knowledge and idea to someone who can maybe do the same with their son. I know it sounds cheesy, but oh well!

As for the Porsche 911... The one from the picture below is a Carrera 4S, which is one of the finest 911s there is.

**Based on my dream designed  
Porsche 911 4S Carrera.**
